SENT TO LSU AGCENTER/LOUISIANA FOREST PRODUCTS DEVELOPMENT CENTER - FOREST SECTOR / FORESTY PRODUCTS INTEREST GROUP

<http://zh-architects.com/the-ethical-case-for-cross-laminate-timber-construction-in-passive-house-design/>

Earlier this summer we were honored to present at the [2016 Passive House Conference in New York City](#). Our Certified Passive House Designer Staz Zakrzewski teamed up with Matthew Lee of Lee Properties Group and talked about challenges and opportunities offered by CLT, or cross-laminate timber construction. We've distilled some of our points and in this article we'd like to share with you the ethical case for working with CLT, as well as demonstrate why wood is increasingly being called the building material of the 21st century.

Richard P. Vlosky, Ph.D.
Director, Louisiana Forest Products Development Center
Crosby Land & Resources Endowed Professor of Forest Sector Business Development
Room 227, School of Renewable Natural Resources
Louisiana State University, Baton Rouge, LA 70803
Phone (office): (225) 578-4527; Fax: (225) 578-4251; Mobile Phone: (225) 223-1931
