SENT TO LSU AGCENTER/LOUISIANA FOREST PRODUCTS DEVELOPMENT CENTER - FOREST SECTOR / FORESTY PRODUCTS INTEREST GROUP

Redesigning sawmills for cross laminated and mass timber production

May 23, 2018

As CLT and mass timber products increase in acceptance as a building material, demand for appropriate wood fiber as a raw material will also increase. How will sawmills of the future as well as existing sawmills adapt their production, optimization, drying, and grading philosophies to meet increased demand?
