PNW Log Costs Remain Near Record Highs

By Joel Swanton

Delivered log prices in the Pacific Northwest (PNW) have maintained near record highs through winter, and the sustained high price run since 4Q2017 is unprecedented in the region. As we head into the warmer spring and summer months, as well as wildfire season, prices are not expected to retreat any time soon.

Southern Yellow Pine Lumber Prices Hit New Record High in May

By John Greene

Southern yellow pine (SYP) lumber prices continue to climb into new record territory as we approach the summer months. Forest2Market's composite southern yellow pine lumber price spiked to a new high of \$521/MBF for the week ending May 11—a 7% jump from the previous week.

Forest Mortality Exceeds Growth in America's National Forests

By John Greene

With wildfire season just a few weeks away in the Pacific Northwest (PNW), the amount of standing dead timber in western national forests is a real concern for both residents and the federal and state agencies that are tasked with fire suppression efforts and mitigating fire damage.

Carbon Accounting is Complex; Forest Benefits Are Simple

By Forest2Market

In a recent meeting with members of the forestry community, Environmental Protection Agency (EPA) Administrator Scott Pruitt said that the Agency issued a “statement of policy making clear, that future regulatory actions on biomass from managed forests will be treated as carbon neutral when used for energy production at stationary sources.” The statement went on to add that “The use of biomass from managed forests can bolster domestic energy production, provide jobs to rural communities, and promote environmental stewardship by improving soil and water quality, reducing wildfire risk, and helping to ensure our forests continue to remove carbon from the atmosphere.”

Brazil's Wood Products Industry is Poised for Growth

By Marcelo Schmid

Forest2Market has closely followed the resurgence of the wood fiber market (and the pine market, specifically) in Brazil over the course of the last several years, which has occurred amid a tumultuous political environment. After a long recessionary period, current domestic market segments like packaging and panels have grown, and the outlook for pine wood products is optimistic.

Chilean Wood Products Market Offers Export & Import Opportunities

By John Greene

The modern forest products industry is truly a global endeavor on every level. Interconnected economies and trade flows allow a vast assortment of forest products—raw materials, energy feedstocks, manufacturing provisions and finished products—to circle the globe in increasing volumes. Nations with large forest resources and forest industries are able to serve both the domestic and export markets, and they are able to participate in the global economy due to supply chain enhancements and increased overseas demand.

Product	2016	2017	2018	2019	2020
Wood products	1,100	1,200	1,300	1,400	1,500
Wood products (excluding pulp)	1,000	1,100	1,200	1,300	1,400
Wood products (including pulp)	100	100	100	100	100
Wood products (excluding pulp) (m³)	1,000	1,100	1,200	1,300	1,400
Wood products (including pulp) (m³)	100	100	100	100	100
Wood products (excluding pulp) (m³)	1,000	1,100	1,200	1,300	1,400
Wood products (including pulp) (m³)	100	100	100	100	100

Finland's Consumption of Domestic Roundwood Reached a new Record in 2017

By John Greene

Per a recent report from the Natural Resources Institute Finland (Luke), the total amount of roundwood consumed by the Finnish forest products industry increased in 2017 for the fifth straight year to its highest level in ten years. Forest industry roundwood consumption totaled 69.7 million cubic meters (m³) in 2017, which represents a 3 percent increase over the prior year and the highest level in nearly 40 years.
