

SENT TO LSU AGCENTER/LOUISIANA FOREST PRODUCTS DEVELOPMENT CENTER - FOREST SECTOR / FORESTY PRODUCTS INTEREST GROUP

I have not re-posted this in the past. If it is of interest you can subscribe.

Algae, sugarcane, 90-ton sewer bung....lots of research and commercialization of biofuels is taking place across a broad spectrum of feedstocks and end-products. <https://biofuels-news.com/shop/>

The screenshot shows the biofuels international website. At the top, there is a navigation bar with links for Home, News, Features, Magazine, Events, Videos, Resources, Free Newsletter, About, Advertise, Login, and Register. Below this is a search bar and social media icons for Facebook, Twitter, LinkedIn, and RSS. The main content area features a large image of a wooden gavel with the headline "New bill plans rise in heating oil biodiesel requirement in Rhode Island" dated Mar 4, 2019. To the right, there is a "CONNECT WITH US" section and a "LATEST VIDEO" section titled "Sourcing waste oils for biodiesel production". Below the main article, there are several "POPULAR NEWS STORIES" including "Biodiesel bipartisan legislation introduced", "Swedish government report concludes airlines should blend biofuels", "China's 'largest' air carrier flies on biofuel for first time", "EPA 'very likely' to complete E15 rule by June", "Gevo enters isoctane sale agreement with HCS Group", and "CropEnergies to resume production at UK ethanol plant". At the bottom right, there are two promotional banners: one for the "FEW INTERNATIONAL FUEL ETHANOL WORKSHOP & EXPO" and another for "STOC EXPO".

Richard P. Vlosky, Ph.D.
 Director, Louisiana Forest Products Development Center
 Crosby Land & Resources Endowed Professor of Forest Sector Business Development
