
A New White Paper:

Will India become an Importer of Industrial Wood Pellets?

On October 8 India announced new policy that mandates that 5% to 10% biomass pellets must be blended with coal by October 2022 in most of its coal fueled power stations.

This new white paper will quantify the demand for biomass pellets based on the Indian coal fueled power generation fleet. It will also offer an opinion on the potential for India to import wood pellets.

FutureMetrics™

**FutureMetrics is
the leading consultancy
in the pellet fuel sector.**

Webinar Video

In this video Dr. Strauss
discusses the wood pellet sector
and the potential for carbon
negative emissions.

The video highlights bioenergy
carbon capture and storage
(BECCS) using several
interactive dashboards.

All of the dashboards used in the video (and many more) are
free to use and accessible at the [FutureMetrics](#) website.

FutureMetrics combines decades of experience with deep operational expertise, powerful sector focused financial modeling skills, and thought leading market awareness.
