SENT TO LSU AGCENTER/LOUISIANA FOREST PRODUCTS DEVELOPMENT CENTER - FOREST SECTOR / FORESTY PRODUCTS INTEREST GROUP

Our relationship with the world around us continues to change on a daily basis. People care a lot more about the impact we're having on the environment than they did a couple of decades ago, with green schemes, sustainability drives and heightened social pressure to take care of the world we share.

For all businesses, including SMEs, there's a sense of expectancy to ensure you're doing everything you can to keep your carbon emissions and other harmful environmental outputs to a minimum. If you run an SME and are unsure exactly how to do that, this guide is here to help.

Whether it's understanding exactly what kind of impact you're already having, or the desire to reduce the size of your footprint, we're here to help you move towards a business model which sees reductions on your impact on the environment.

RESOURCE GUIDE

An SME's guide to reducing your carbon footprint and environmental impact

<https://www.retailmerchantservices.co.uk/sme-environmental-impact-carbon-footprint-guide/>

This guide shares valuable information, including:

- **The benefits of being net-zero** as an SME
- How to **calculate your business' carbon footprint**
- **Reporting your carbon footprint**
- **Actionable ways to reduce emissions**, both as a brick-and-mortar and online SME

Richard P. Vlosky, Ph.D.

Director, Louisiana Forest Products Development Center
