A large, stylized, halftone-style illustration of a tree with a thick trunk and a full canopy of leaves, serving as a background for the title text.

TRADE OF ROUNDWOOD AND SAWNWOOD BY SPECIES

2000 - 2003

UNITED NATIONS

Trade of Roundwood and Sawnwood by Species

Table of Contents

Notes, Acknowledgements	2
Trade of Coniferous Industrial Roundwood by Species	4
Trade of Non-Coniferous Industrial Roundwood by Species	9
Trade of Coniferous Sawnwood by Species	17
Trade of Non-Coniferous Sawnwood by species	22
Questionnaire 2004	30

Geographic Disclaimer

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Note

One of the most frequent requests received by the secretariat concerns the species composition of trade flows, a matter which is of the greatest interest to producers and exporters of roundwood and sawnwood. This information has been collected in the context of the Joint Forest Sector Questionnaire for the past several years but data are being published now for the first time. We hope to publish available data from earlier years in a subsequent edition of this publication. We welcome your comments, which should be sent to the address below.

Although the data have been reviewed and controlled for incorrect or unusual values, the quality of the data is limited by the fact that some countries did not provide any data or provided only partial data, and by our decision that publishing the information we do have is preferable to keeping it unavailable while trying to perfect it.

Definitions

The *Forest Products Statistics* includes definitions for roundwood and sawnwood. A copy of the questionnaire and the associated Harmonised System (HS) trade classification codes is available at the end of this publication.

Data source

Data are provided through national correspondents who reply to the Joint Forest Sector Questionnaire, issued by ECE/FAO/Eurostat and ITTO. Attention should be paid to the fact that the figure for total trade in an item comes from the JQ2 questionnaire (trade of forest products) whereas the subitems come from the ECE1 questionnaire (trade by species). Although in theory these two should correspond, in a number of cases the figure for the total is different from the figures given for the subitems. We regret any confusion this may cause and will continue to investigate with national correspondents the reasons for these discrepancies and to reduce them.

Data aggregation and processing was finalized in November 2004.

Symbols and Abbreviations used

m³ = cubic meter
US \$ = US Dollar
... = not available
E = estimate by the secretariat
R = figure repeated from the previous year
C = automatic calculation

Acknowledgements

We would like to thank the correspondents who provided data through the Joint Forest Sector Questionnaire as well as the members of the Intersecretariat Working Group on Forest Sector Statistics. These data would simply not be available without their contribution. A list of correspondents, along with contact details, can be found in the *Forest Products Statistics* publication. This publication could not have been produced without the enthusiastic work by Ms. Caroline Stein in reviewing and preparing the data for publication. Her internship was made possible by support from the German Academic Exchange Service's Carlo Schmid Programme.
